

PC Card Reader Icons

www.newformula.org

Icons must not be distributed without prior permission from the author, and must include this Read Me.

How to Use:

Pixadex iContainer- Open them up in Pixadex (<http://www.iconfactory.com>) and use as you see fit.

Regular Icons- Get Info, copy the icon, Get Info of destination item, paste icon. I thoroughly recommend using the FinderIconCM tool to make your life 10x easier when doing this, from <http://www.pixtore.com>

These icons are free! That means I spent hours of work on these for your benefit... as such any donations via paypal would be much appreciated. I suggest that if you find yourself using any of these on a daily basis then thats about time to consider donating- a few pounds would buy me a much appreciated beer- go <http://www.paypal.com> and use my email address, keith@newformula.org

Enjoy.
